MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

During the period, the Group maintained its market position as one of the leading VCMA solution service providers in Hong Kong. The Group's revenue is primarily derived from the provision of (i) VCMA solution services and maintenance services and (ii) cloud-based IT+OT managed services.

Provision of VCMA solution and maintenance services

The outbreak of COVID-19 pandemic since early 2020 has adversely affected the global business environment, posing a short-term threat to the Group's VCMA solutions business. During the period under review, the VCMA business performance had seen rebound and recovery as normal business resumes after the COVID-19 pandemic. Although there is a decrease in the revenue from VCMA maintenance services, the demand for VCMA solution services gradually resumed and the revenue increased by approximately 8.2% compared to same period of last year.

Provision of cloud-based IT+OT managed services

The Group has strategically expanded into the PRC's ubiquitous Internet of Things (IoT) by offering integrated IT+OT managed services through its 85% owned subsidiary, Beijing National Greenfield Technology Co. Limited* (北京能興國雲信息科技有限公司) ("Beijing National Greenfield") in the PRC. In March 2023, Beijing National Greenfield made breakthroughs in solutions, products and service capabilities by combining its superior technologies including security and IoT, and completed the development and launch of its "Next Generation Intelligent Operation and Management Platform". With the new platform completed, the Group entered into contract with new international hospital customer for the platform products for the first time, and expect to complete the project in 2024.

During the period under review, Beijing National Greenfield continued to expand its business relating to security products of its own brand, secured an order from a well-known semiconductor brand in the PRC and completed the delivery of its products online, and secured the renewal of the contracts of its existing security product customers in previous years, which started to generate rolling revenue during the period under review.

In addition, based on the real-time energy management system function module in the existing "Next Generation Intelligent Operation and Management Platform", and combining security and IoT technologies, Beijing National Greenfield initiated the research and development of an independent "Intelligent Energy Saving Platform" product targeting for building the heating ventilation and air-conditioning system ("HVAC System") by analyzing the brand new and big operation data and controlling with artificial intelligence. In October 2023, the Group obtained the recognition of a well-known commercial complex customers, and carried out the installation and operation of relevant energy-saving products with good energy-saving effects. The "Intelligent Energy Saving Platform" product will be deployed for high energy consumption buildings including commercial complexes, offices, hotels, hospitals and schools, cultural and transportation buildings, under the premise of micro-renovation and rapid completion of online deployment, so as to carry out efficient energy saving for building the HVAC System, reduce building energy consumption and carbon emissions using security, IoT, big data and artificial intelligence technologies, and achieve better green development.

FINANCIAL REVIEW

Revenue

The Group's revenue increased by approximately HK\$2,124,000 or 2.9% from approximately HK\$73,560,000 for the six months ended 30 September 2022 to approximately HK\$75,684,000 for the six months ended 30 September 2023.

Revenue generated from VCMA solution services increased by approximately HK\$4,639,000 or 8.2% from approximately HK\$56,420,000 for the six months ended 30 September 2022 to approximately HK\$61,059,000 for the six months ended 30 September 2023. The increase was mainly attributable to the resumption of projects in offices after the ending of work from home arrangement commonly implemented during the COVID-19 pandemic.

Revenue generated from VCMA maintenance services decreased by approximately HK\$1,525,000 or 14.9% from approximately HK\$10,268,000 for the six months ended 30 September 2022 to approximately HK\$8,743,000 for the six months ended 30 September 2023, which was mainly due to decrease in total maintenance projects after the completion of related project of VCMA solution services.

Revenue generated from AIoT operation and other services decreased from approximately HK\$5,586,000 for the six months ended 30 September 2022 to nil for the six months ended 30 September 2023. The significant decrease was due to the delay in delivery of the project as a result of an unexpected prolonged period of time required for obtaining approval of an on-site fire-fighting system from the local government and hence the delay in the recognition in the relevant revenue. Revenue generated from security services increased significantly by approximately HK\$4,596,000 or 357.4% from approximately HK\$1,286,000 for the six months ended 30 September 2022 to approximately HK\$5,882,000 for the six months ended 30 September 2023. The increase was attributable to continuous expansion with increased demand from existing customers.

For details of the segment information, please refer to note 4 to the condensed consolidated financial statements in this announcement.

Gross operating profit and gross operating profit margin

Gross operating profit is calculated based on the revenue for the period minus cost of sales for the period. Gross operating profit margin is calculated based on the gross operating profit for the period divided by the revenue for the period and multiplied by 100%.

Gross operating profit decreased by approximately HK\$1,223,000 from approximately HK\$26,289,000 for the six months ended 30 September 2022 to approximately HK\$25,066,000 for the six months ended 30 September 2023 which is mainly due to reduction of gross profit margin of VCMA maintenance projects.

Gross operating profit margin slightly decreased from approximately 35.7% for the six months ended 30 September 2022 to approximately 33.1% for the six months ended 30 September 2023.

Staff cost

Staff cost increased by approximately HK\$1,925,000 or 10.8% from approximately HK\$17,748,000 for the six months ended 30 September 2022 to approximately HK\$19,673,000 for the six months ended 30 September 2023. It was mainly due to salary increment for some technical staffs.

Other operating expenses

Other operating expenses mainly comprised legal and professional fee, promotion and exhibition expenses, rent and rates, trip and travelling expenses and other office expenses. Other operating expenses increased by HK\$104,000 or 2.5% from approximately HK\$4,115,000 for the six months ended 30 September 2022 to approximately HK\$4,219,000 for the six months ended 30 September 2023, which was mainly due to additional promotion and exhibition expenses incurred during the six months ended 30 September 2023.

Income tax expenses

Income tax expenses remained stable at approximately HK\$405,000 for the six months ended 30 September 2023, which was due to combined impact of a decrease in taxable profit in Hong Kong arising from the decrease in gross profit and the impact of deferred tax.

(Loss) profit for the period

The financial results for the six months ended 30 September 2023 shifted from profit for the period of approximately HK\$2,035,000 to loss for the period of approximately HK\$3,023,000, which was mainly due to the decrease in gross operating profit and increase in staff cost and depreciation and amortisation.

OTHER INFORMATION

PROSPECTS

Looking ahead, the Group will continue to maintain and strengthen its position as one of Hong Kong's leading service providers of VCMA solutions and to further expand its market share in the cloud-based IT+OT managed services industry in the PRC. As Hong Kong's economy gradually recovers with the macro-economy rebounding, it is expected that demand for VCMA solution services will increase gradually. In the near future, the Group believes that more companies will expeditiously seek to transform their operations with smart devices and cloud-based technologies both in Hong Kong and across Asia. Given the Group's market-leading position in Hong Kong, this will create enormous business opportunities for the Group to provide integrated one-stop VCMA solutions as well as cloud-based IT+OT managed services.

In the coming financial years, Beijing National Greenfield will simultaneously seize the four aspects: 1) high-quality and timely delivery for existing customers' business; 2) renewal and expansion of existing customers; 3) expansion and execution of new customers; and 4) continuous research and development and market expansion of new products, including the "Next Generation Intelligent Operation and Management Platform" and the "Intelligent Energy Saving Platform", bringing stable development for Beijing National Greenfield's business in the coming financial years.

The Group would adopt a prudent yet proactive development strategy and continue to explore potential investment opportunities, seize every business opportunity and deliver satisfactory long-term returns to the shareholders of the Company.
